

Morrisroe Group acquires GSS Piling Ltd and Geostructural Solutions Ltd

Morrisroe Group is pleased to announce that it has purchased specialist contractors Geostructural Solutions Ltd and GSS Piling Ltd (GSS). These companies offer a widely respected service in structural underpinning, substructure and basement works and restricted access piling and complement Morrisroe's closely aligned technical competencies and geographical footprint. GSS will operate independently of Morrisroe's other businesses, however, the deal will strengthen both companies' customer offering. Martin Pedley of Morrisroe will be appointed as Managing Director and will work closely with GSS founding owner Andy Parks, who will remain actively involved in business operations.

Andy Parks comments:

"This deal is great news for GSS as it brings the necessary resources for us to take the Solutions and Piling brands to the next level on our 15th anniversary. I see many synergies in being part of Morrisroe Group. I'm proud of our team's achievements so far and am very happy to be part of the future success within Morrisroe Group".

Brian Morrisroe, CEO Morrisroe Group comments:

"This is an exciting opportunity for us, fully aligned with our strategy to offer our clients a broader scope of services, particularly in respect of executing basement boxes, substructure and foundation works. We are looking forward to welcoming Andy and the GSS team and its clients alike into our group."
